

JAMAL BOUJBARI

Full Stack Web Developer

Casablanca, Morocco | (+212) 639411280 | jamalboujbari@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFILE

Full Stack Web Developer with strong expertise in JavaScript, React, Node.js, Express.js, and PostgreSQL, dedicated to building responsive, high-performance web applications with a user-first mindset. A fast learner and collaborative team player, passionate about solving real-world problems through clean, scalable code and modern technology stacks. Combines deep technical knowledge with business acumen to define product vision, prioritize development efforts, and deliver user-centric solutions. Brings 2 years of experience as a Product Owner, successfully delivering mobile and web applications aligned with user needs and business objectives. Skilled in managing product backlogs, prioritizing user stories, and working closely with cross-functional teams throughout the development lifecycle. Possesses excellent communication and analytical skills, with a proven ability to bridge the gap between technical and business stakeholders, ensuring that development efforts align with strategic goals and result in meaningful, long-term user satisfaction.

HARD SKILLS

- **Front-end** : HTML5, CSS3, JavaScript, Java, C++
- **Back-end** : ReactJS, Bootstrap, ExpressJS
- **Database** : PostgreSQL, MySQL, SQL Server
- **Tools** : Git, GitHub, Vercel, Render, Firebase, Jira

SOFT SKILLS

- **Teamwork / Collaboration**: Worked closely with technical and administrative teams.
- **Communication**: Strong interpersonal and stakeholder coordination abilities.
- **Problem Solving**: Analytical approach to billing, logistics, and software development tasks.
- **Adaptability / Fast Learning**: Transitioned from academic background to full stack developer and product owner.
- **Leadership & Organization**: Managed inventory, coordinated logistics, supervised IT projects.
- **Time Management**: Handled multiple responsibilities in previous roles.
- **User Focus**: Emphasis on user-centric web solutions and customer return processing.
- **Critical Thinking**: Prioritized product backlogs and evaluated business needs.

- Project Management: Experience managing development cycles using Agile and Scrum practices
